

Modeling Assignment

The assignment was to model a constituency-based parse tree for each of the following three sentences.

Please note that the diagrams below were made from the bracket notation answers using the free, online jsSyntaxTree service found at <https://ironcreek.net/syntaxtree>.

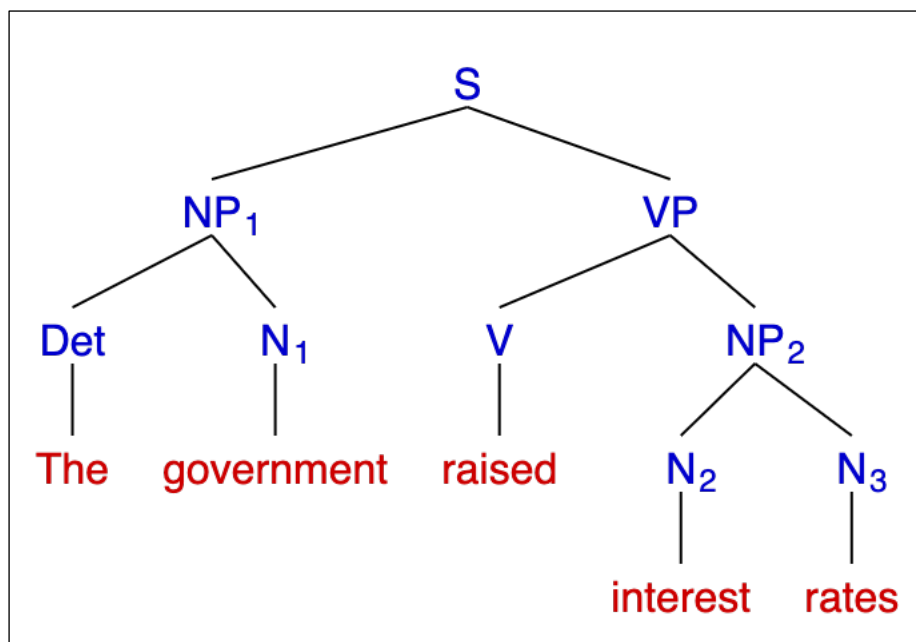

Sentence 1

The government raised interest rates.

Bracket Notation 1

[S [NP [Det The] [N government]] [VP [V raised] [NP [N interest] [N rates]]]]

Diagram 1

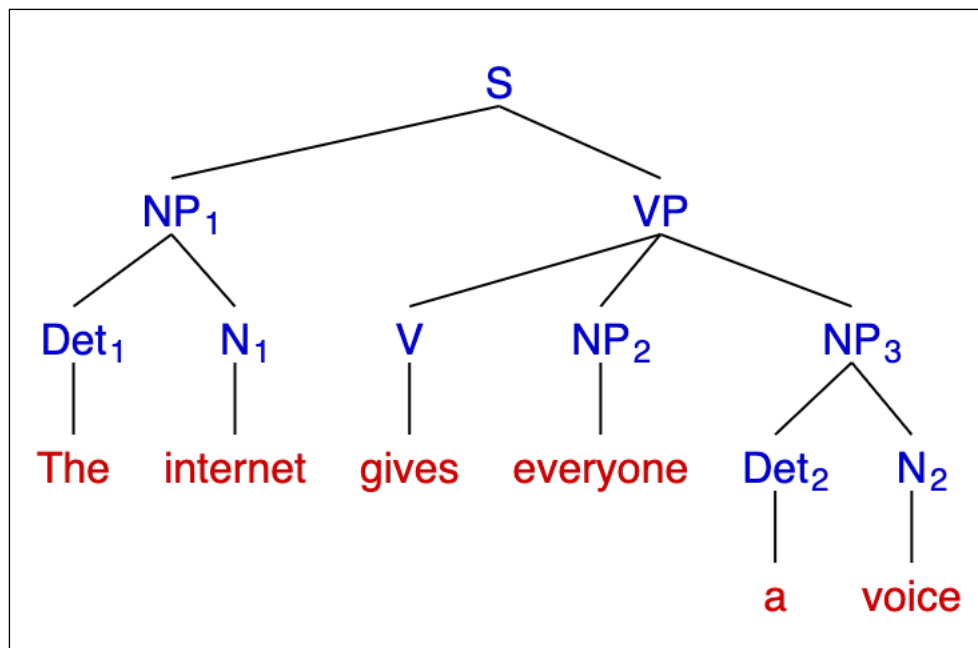

Sentence 2

The Internet gives everyone a voice.

Bracket Notation 2

[S [NP [Det The] [N internet]] [VP [V gives] [NP everyone] [NP [Det a] [N voice]]]]

Diagram 2

Sentence 3(a): First Interpretation

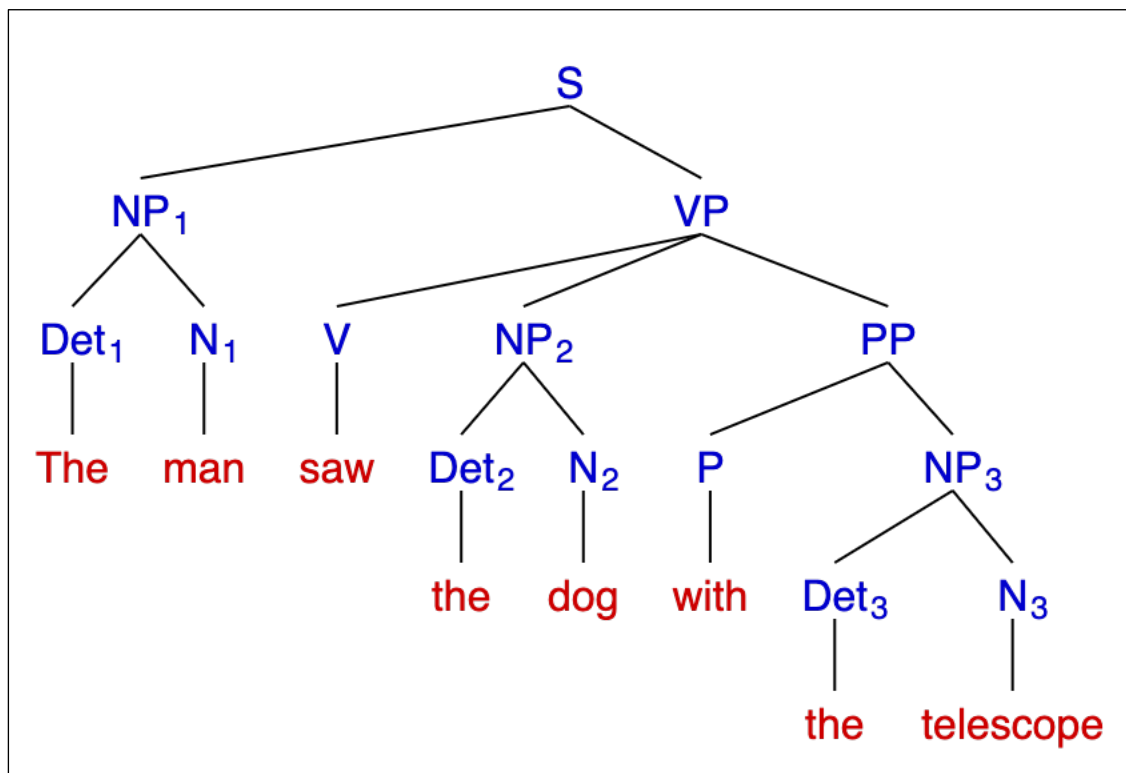

The man saw the dog with the telescope.

A first interpretation of this sentence assumes that the man used the telescope to see the dog.

Bracket Notation 3(a)

[S [NP [Det The] [N man]] [VP [V saw] [NP [Det the] [N dog]] [PP [P with] [NP [Det the] [N telescope]]]]]

Diagram 3(a)

Sentence 3(b): Alternate Interpretation

The man saw the dog with the telescope.

An alternate interpretation of this sentence assumes that the man saw the dog in the vicinity of, or in possession of, the telescope in some manner.

Bracket Notation 3(b)

[S [NP [Det The] [N man]] [VP [V saw] [NP [NP [Det the] [N dog]] [PP [P with] [NP [Det the] [N telescope]]]]]]]
